

We have a confession to make...

We're ***OBSESSED (but totally not crazy)*** with keeping our courses up to date and modern. We believe it's what has made ZTM so successful as a tech school and why so many students succeed here. We work ***RELENTLESSLY*** to stay on top of the industry and **update ALL of our courses several times a year** as new libraries, best practices and tools come out, which is why we guarantee that ZTM courses are the most up-to-date courses on the internet... but...

...with that said, sometimes it also helps if you, the *student*, notices something that needs updating. Although we try to make sure we catch ***EVERYTHING***, maybe something has slipped through the cracks.

As you go through the course, if you notice something that needs updating, we have created **a 10 second form to notify** the instructor of the course so that they can update it and make the appropriate changes and updates.

They will be woken up in the middle of the night from their beautiful deep sleep and get an alert to get up right away, dump cold water on their head, and go straight into their recording studio... or something like that.

We want to ensure you're taking the most up-to-date courses ***IN THE WORLD*** and this is one way we can do this! Thank you and enjoy the course :)
